#### Company Update

2Q'20/21 sales of the company were up by 40% and to a great extent driven by exceptionally good harvest. However, the profitability was a stumbling point due to a number of reasons (the company reported 87% drop in operating profit and net loss): 1) the specifics of grain trading business as costs related to the transactions are booked this quarter, while the income is going to be recorded next quarter; 2) lower profitability in the food segment (poultry primarily) as the costs of raw materials increased while product prices were under pressure due to COVID. Currently Linas Agro is engaged in the M&A process, intending to acquire Lithuanian agro-company KG Group that supplies poultry and grain. The deal is expected to be financed with 30% in cash, but the financing details will be provided after regulatory approvals are received. The weather conditions look favourable for this year harvest.
