Company Update

Q4 2019 revenue declined by 17% y/y to EUR 99m, while the full-year revenue was down by 22% y/y to EUR 327m. The decline came as expected as markets are cooling off after strong 2018 and the absence of large projects comparing to 2018 (construction of very large shopping centers in Tallinn and Riga) was also a factor. Main business indicator - secured orders - was down to EUR 141m, a 38% decline comparing to the figure a year ago. Fewer commercial real estate sites are being built because the competition is stiffer, construction prices have risen and financing conditions have become more complicated. Surprisingly that in spite of the significantly lower revenue, the company was able to improve operating profitability, citing "a more precise selection of construction projects and the team's effectiveness". Operating profit for 2019 declined by 3.2%, but the Operating margin increased to 5.9% (+110bps). However, FY Net profit declined by 16%, affected mainly by a significant increase in income tax expense (due to dividends paid in 2Q 2019).
