### Alphinox Quantitative score

Company's financial displays conditions, growth pace and valuation based on latest results and stock price

#### Company Update

FY 2020 was indeed a tough year for Silvano as sales declined by 28% - sales in major markets were down within the magnitude of -34% to -27%. Annual net profit declined by 77% as the exchange rate movements have been very unfavourable for Silvano. The results in 4Q'20 were not as drastic as in the preceding quarters, but top line nevertheless continued its downward trend with sales at 28% lower versus last year. Silvano, however, has managed to improve its profitability in 40: gross profitability was down by 26%, operating and net profit were down by 17.1% and 2.3% respectively, latter helped by more favorable exchange rates. The company managed to cut its distribution expense by 34%, while administrative expenses were cut only by 22%. It is worth noting that Silvano has kept its staff in retail operations to full extent: 503 employees in 2019, 500 in 2020. Company also managed to maintain its financial position as equity ratio remained on the high level, declining from 66% to 64%.
