Company Update

Latvian pharma company Olainfarm reported a moderate decline in 2Q'21 sales of 2.4% as it still feels the negative effects of the pandemic. Gross profit, however, demonstrated steeper decline of 12% mainly driven by higher marketing costs in Russia and Ukraine. The effect of marketing costs, coupled with bad debt provisions, have had a dramatic impact on OLFA's profitability - bottom line in 2Q'21 sank by 68%. However, the decline in company's Operating Cash Flows in comparison was less significant with 12% drop versus last year. Olainfarm continues to repay bank loans, making its already good balanace sheet even more robust. At the same time, future development of the company is not completely clear and it even might be staggered due to constant changes in management and supervisory board.
