# VALUATION

## Company Update

As the restrictions have been lifted TKM was able to make investors happy with 6.2% growth in 3Q'21 sales and 62% growth in operating profit. According to the company's management, the sales of durable goods were supported also by the active use of funds from 2nd pension pillar received by Estonians as a results of pension reform. Major contributors to sales growth were car segment (10% growth; 18% of total sales) and Supermarkets (5.9% growth; 69% of sales; comparable stores sales per. sq. m grew 4.6%, exceeding inflation). Revenue growth was also supported by the development of e-commerce (e-Selver) - number of orders doubled. TKM was able to significantly increase its profitability - EBIT increased 62% and 3Q'21 net profit was up by 69%. The reason of such a high increase in profitability given only single-digit increase in revenues is that Tallinna Kaubamaja has low margin level (6.7%), so slower growth of expenses led to strong increase in earnings.
